Research Interests

Education

2016-2020 **University of Oxford - PhD in Statistics on the OxWaSP program**
Working with Professors Thomas E. Nichols and Armin Schwarzman on developing statistical methods for image analysis with applications in Neuroimaging, Astrophysics and beyond. Specializing in Random Field Theory, Multiple Testing and Selective Inference.

2012-2016 **University of Cambridge - BA and Masters in Mathematics**
Distinction, coming 20th in the year out of 240 students and 1st in my college. Thesis on Network Changepoint Detection in fMRI data.

2010-2012 **IB (International Baccalaureate) Diploma: 43/45 points**
Higher Level Mathematics, Physics and Chemistry all 7 (highest mark).

Research Internships

07/19-08/19 **Technion - Israel Institute of Technology**
I will be working with Professor Armin Schwarzman and Dr. David Azriel. We will be continuing our work on peak detection.

01/19-03/19 **University of California San Diego**
I spent 2 months working with Professor Armin Schwarzman at UCSD. We worked on developing confidence regions for the locations of peaks in a random field.

07/16-08/16 **Mercedes and the University of Cambridge**
I worked with the Mercedes Racing Team fitting mixed effects models to help understand tyre degradation.

06/15-07/15 **STATSLAB - Department of Statistics at the University of Cambridge**
I worked with Professor Chris Rogers on a project that involved analyzing the distribution of financial time series and backtesting statistical trading strategies.

06/14-08/14 **STATSLAB - Department of Statistics at the University of Cambridge**
I worked with Professor Nathanael Berestycki on analysis of the adjacent transposition shuffle.

Reviewing

Neuroimage, Journal of Computational and Graphical Statistics and Frontiers in Neuroscience
I've been a reviewer for articles in these journals and in this capacity have reviewed a number of articles on Random Field Theory.

Publications

Samuel J. Davenport and Thomas E. Nichols. Selective peak inference: Unbiased estimation of raw and standardized effect size at local maxima, bioRxiv preprint, 2019.

Awards

2016 **King's College Cambridge - Part III Mathematics Prize**

2011 **Silver Medal - British Mathematics Olympiad**
Came 29th out of around 1100 participants.

Other Interests

I dance competitively (Lindy Hop, Acrobatic Rock n Roll, Salsa and others) and play squash. I also enjoy cooking and baking.
